DETAILED ACTION

Receipt is acknowledged of the amendment filed 08/08/2007.

The rejections under 35 USC 112, first paragraph for written description and scope of enablement, as well as the rejection under 35 USC 102(b) are hereby withdrawn.

The following rejection is maintained in this action:

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 4 and 10 provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 10 of

Art Unit: 1615

copending Application No. 10/713,926 (US'926). Although the conflicting claims are not identical, they are not patentably distinct from each other because US'926 claims the combination of an resinate of an opiate (a known controlled substance) in an oral dosage form (claim 1), which may additionally have an aversive agent added (claim 10). As such, those of ordinary skill would have found it well within their skill to claim the instant pharmaceutical which combines a resinate of a drug and an aversive agent with a reasonable expectation of similar aversive results if the dosage form is tampered with intent to abuse the drug. The instant claims would have been obvious to one of ordinary skill in the art given the claims of US'926.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

Applicant's arguments filed 08/08/2007 have been fully considered but they are not persuasive.

Applicant argues that neither application has been patented. That is correct. However, this is not the last rejection in this case, and the application can not be allowed at this time.

The following is a new rejection in response to applicant's amended claims:

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Regarding claim 3, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention.

See MPEP § 2173.05(d).

Claims 5-9 are objected to as dependent upon a rejected base claim.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
